

MCU-Coatings can do the job where others fail and our track record is impressive.

Trinidad Power Plant

PROBLEM– Condenser Waterbox Recoating – NO time for sandblasting & recoating, Direct Sea water contact, Heavy salts, rust & corrosion, Wet Substrate, Condensate leaks, Confined Space,

SOLUTION –Hand Tool Prep- Primer – Miozinc & Topcoat – Ferroguard @ 5 mil DFT , Quickcure Additive – Full 2 layer cure in 1 hour, Cost – Cheaper than Blasting & recoating
